One symbol. One wordmark.

The SlideIn identity is a symbol and a wordmark that were drawn to belong together. The symbol is two folded paper ribbons that slide over one another into an S. Where one sheet lies over the other they share exactly one square: the **stop**, the brand's full stop in solid form. The wordmark is **SlideIn.** set in Fraunces, with the same orange full stop.

The favicon is the symbol's smallest size, not a separate mark. Everything in this guide inherits from `brand/source/slidein-symbol-master.svg`.

The symbol

CONSTRUCTION

Two ribbons, each 96 units wide on a 512 grid, turn 180° about the centre. Every corner is concentric (outer radius 104, inner 8). The shared square is **1 x**, and **x is the unit that measures the whole system**: it is 24.5% of the symbol's height.

TWO OPTICAL SIZES, ONE SYMBOL

From 64 px up, the master geometry. At 48 px and below (the browser tab), the same construction drawn on a 16-pixel grid with heavier ribbons and tighter gaps, so edges land on whole pixels. They are not two designs.

READING

Orange is dominant so the symbol survives both light and dark surfaces. The black stop appears only on light grounds; on black and dark grey it turns ivory (the reversed logo), because a black stop would disappear.

DIMENSIONAL VERSION

The Blender render (`brand/favicon/renders/master-3d.png`) is a presentation of the same geometry, used for the large app icons. It never replaces the vector master.

The logo system

PRIMARY · HORIZONTAL

Website, documents, presentations. Default everywhere there is room.

COMPACT · HORIZONTAL

Navigation, app headers and any logo under 28 px tall. Wordmark cut for small sizes (Fraunces optical size 24).

STACKED

Social profiles, square layouts, covers.

SYMBOL ONLY

Favicon, avatar, GitHub, app icon, launcher. The exact approved symbol.

WORDMARK ONLY

SlideIn.

Where the symbol already appears nearby.

Construction and clear space

MEASURED, NOT EYEBALLED

Rule	Value
Unit **x**	the stop square (24.5% of symbol height)
Symbol height	baseline to ascender of the wordmark
Symbol–wordmark gap	1.25 x
Clear space	**2 x** on every side
Primary aspect	5.694:1 (width : height)
Compact aspect	5.8931:1
Stacked aspect	1.0038:1

MINIMUM SIZE

Logo	Minimum
Primary horizontal	120 px wide (21 px tall)
Compact horizontal	106 px wide (18 px tall)
Symbol	24 px; below that use the favicon drawing (16 / 32 px)

Colour

Brand orange
#FF6200 · RGB 255, 98, 0
Symbol (front ribbon). Exact value in app/styles/tokens.css (--color-brand).

Fold orange
#C94700 · RGB 201, 71, 0
Symbol (back ribbon) and the wordmark's full stop. Introduced with the favicon; not yet a token in tokens.css.

Ink
#0A0A0A · RGB 10, 10, 10
Wordmark and one-colour black. The site's hero ink (--scaffold-ink).

Stop black
#0B0B0C · RGB 11, 11, 12
The stop square. Introduced with the favicon; within 1/255 of Ink.

Warm ivory
#F6F4F0 · RGB 246, 244, 240
The site's paper (--color-paper-50). Default background.

Ivory stop
#F6F1E8 · RGB 246, 241, 232
The stop on the reversed (dark-background) logo.

CMYK and Pantone values have not been established for SlideIn and are deliberately not listed here. They need a print proof against a named profile before being recorded; do not convert the HEX values by formula.

Wordmark

SlideIn.

SlideIn. is set in Fraunces (SIL Open Font License 1.1), weight 600. Primary and stacked use optical size 48; the compact logo uses optical size 24 with slightly looser tracking, because fine hairlines fail at small sizes.

Tracking −0.02 em (−0.01 em compact). Kerning is the font's own, plus one custom adjustment: the full stop is drawn 0.014 em closer to the *n*. Capital **S** and **I** are part of the name; the full stop is part of the mark and is always orange.

The wordmark ships as outlined paths, so no font is required. Source: `brand/source/wordmark/` (extractor script, glyph data, licence).

Incorrect use

Do not stretch

Do not squash

Do not rotate

Do not recolour

Do not add shadows or effects

Do not change the symbol–wordmark spacing

Do not use the default logo on a dark ground (the stop vanishes)

Do not replace the wordmark typography
